

**AMPHITHEATER & KIDZONE
MONACO NGHI SON, THANH HOA**

LANDSCAPE
FINAL LIGHTING CONCEPT

04 October 2018

OPTION 1
IMMERSIVE EXPERIENCE

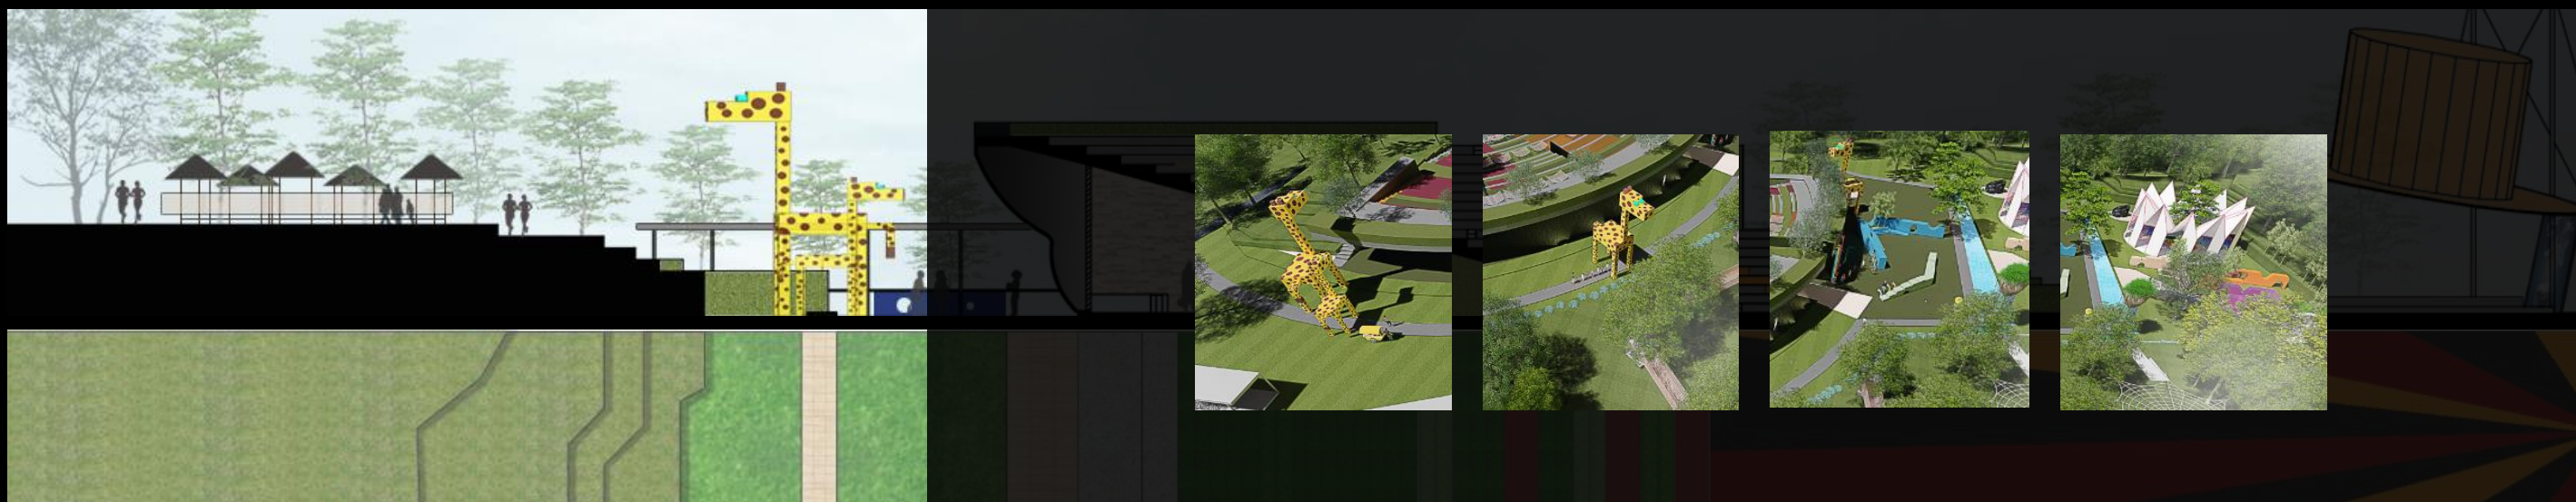

Day scheme

Night scheme (inversion)

The land texture transforms into its hidden appearance when the night comes

Kid zone, Circulation

Curiosity

Interest

orientation

Illuminated features appear along the pathway for guest attention drawing, there's also some interesting places for selfie activity while the background is kept quiet

Open stand for community activities

Experience

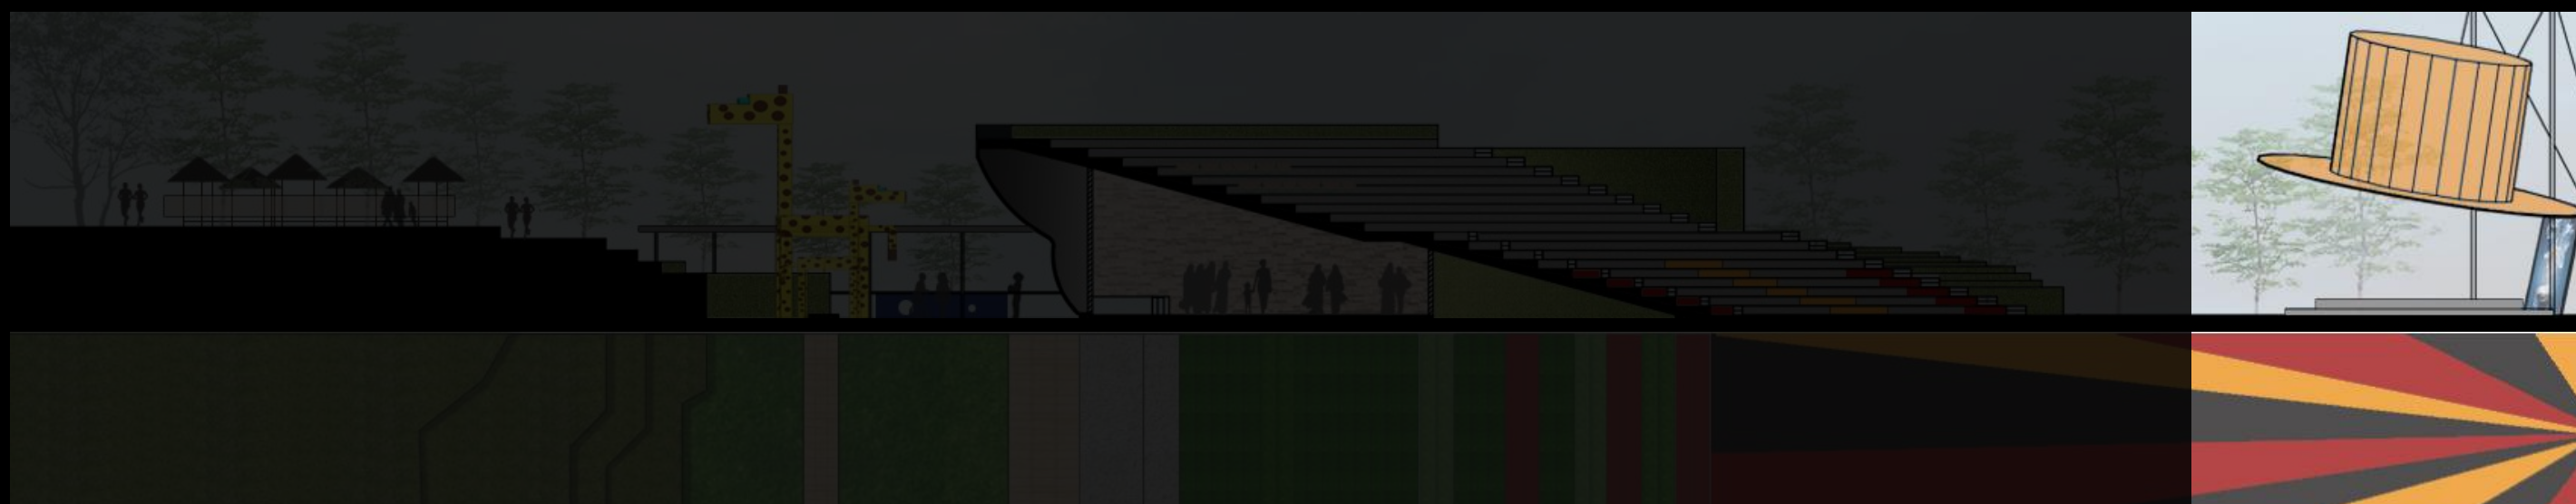

vision

Diversity

The lighting field syncs with music or guest could experience the light dancing under their own paces by interactive lighting system

The show content could be relevant holiday/event meaning.

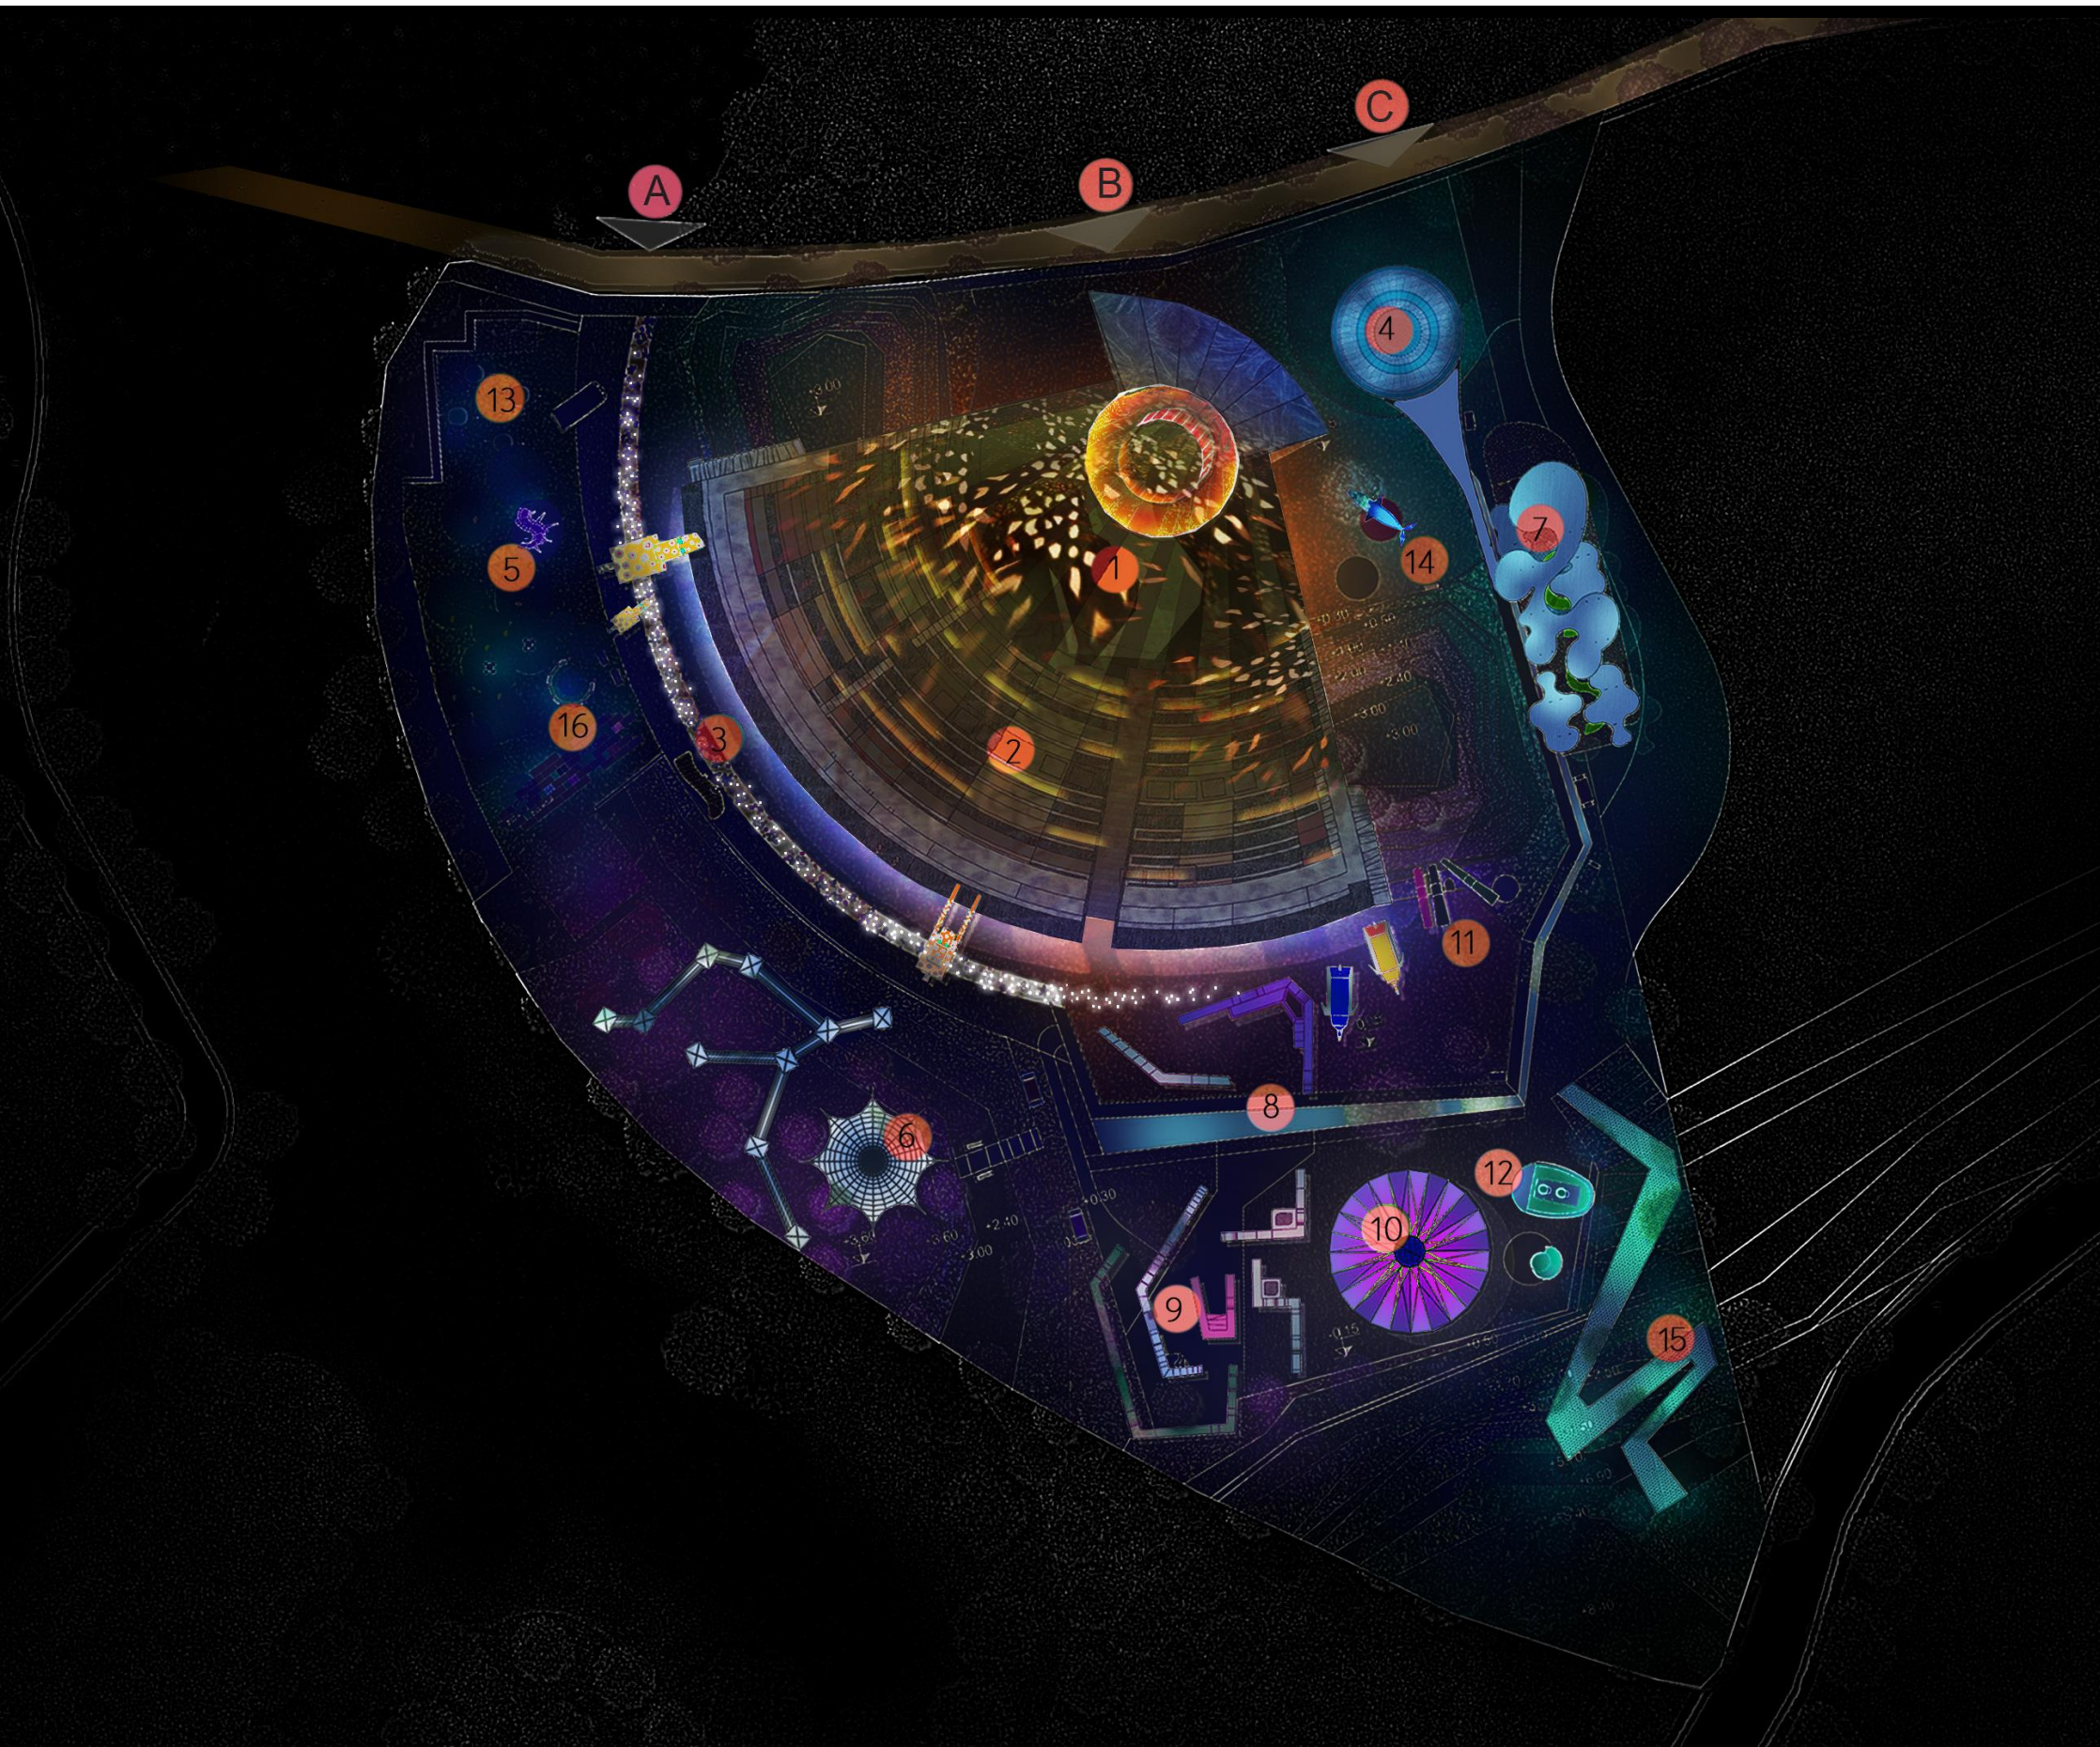

Performance point

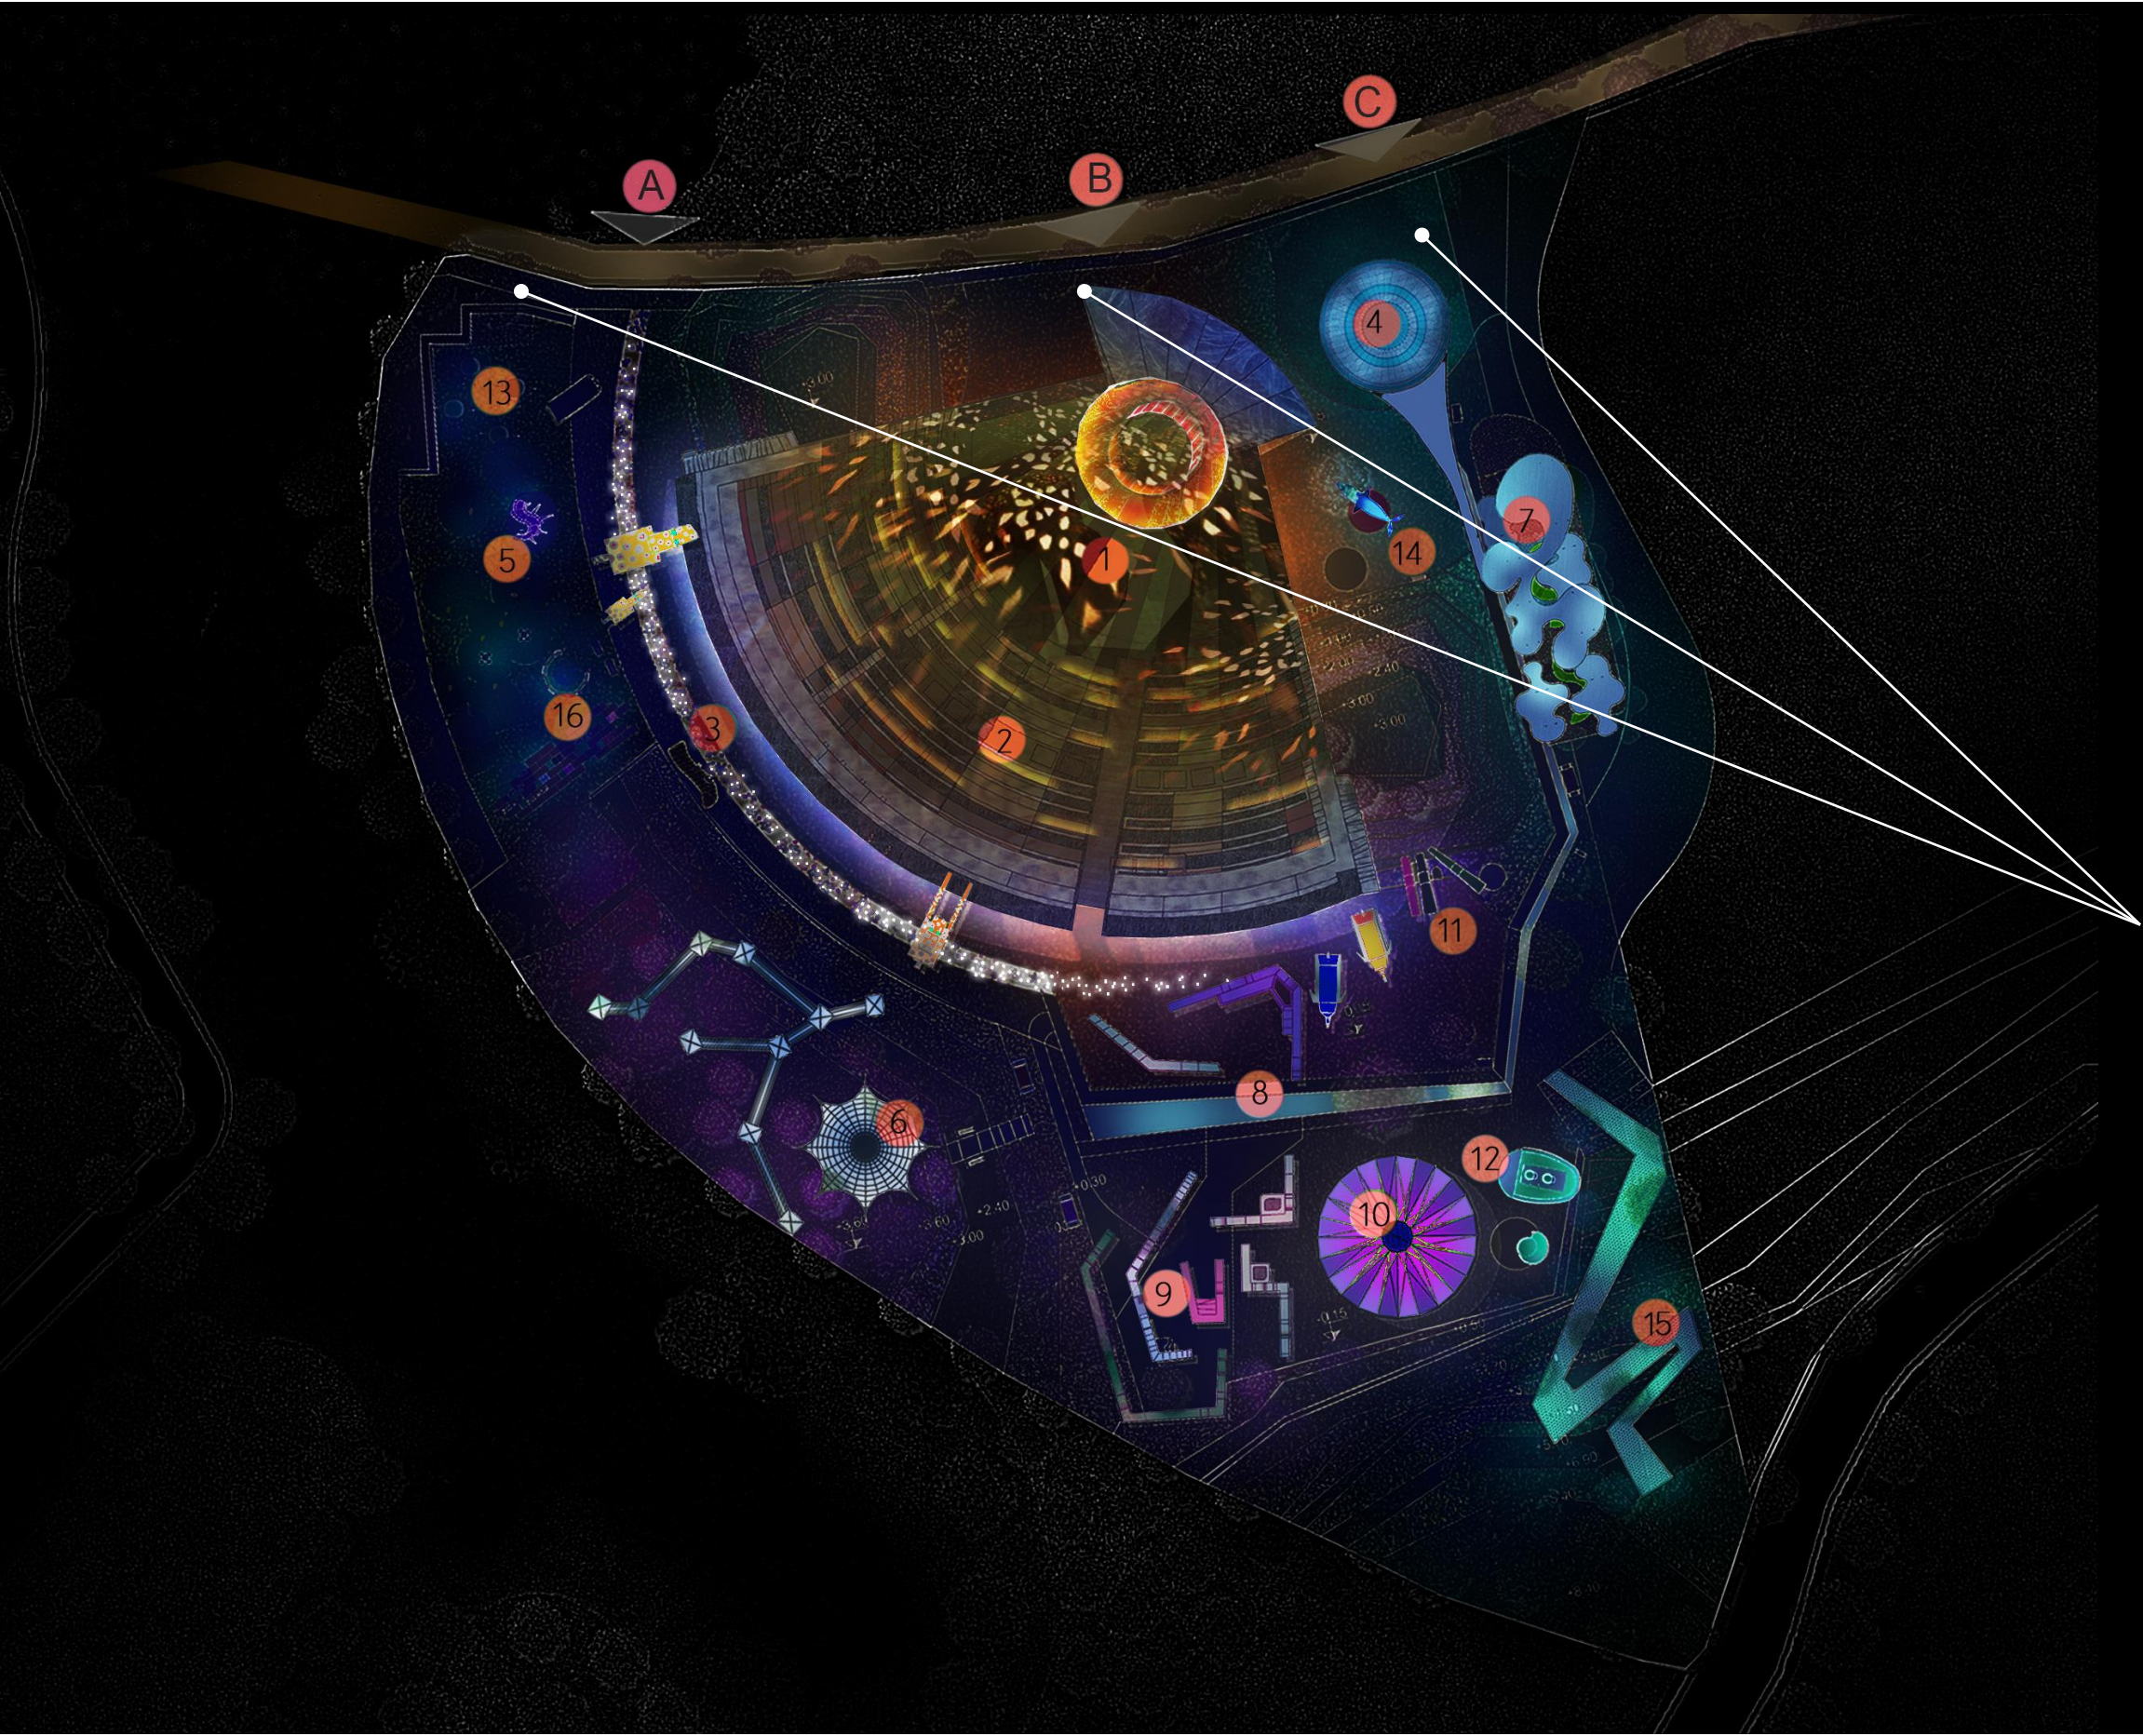

Experience
concentration
Unique

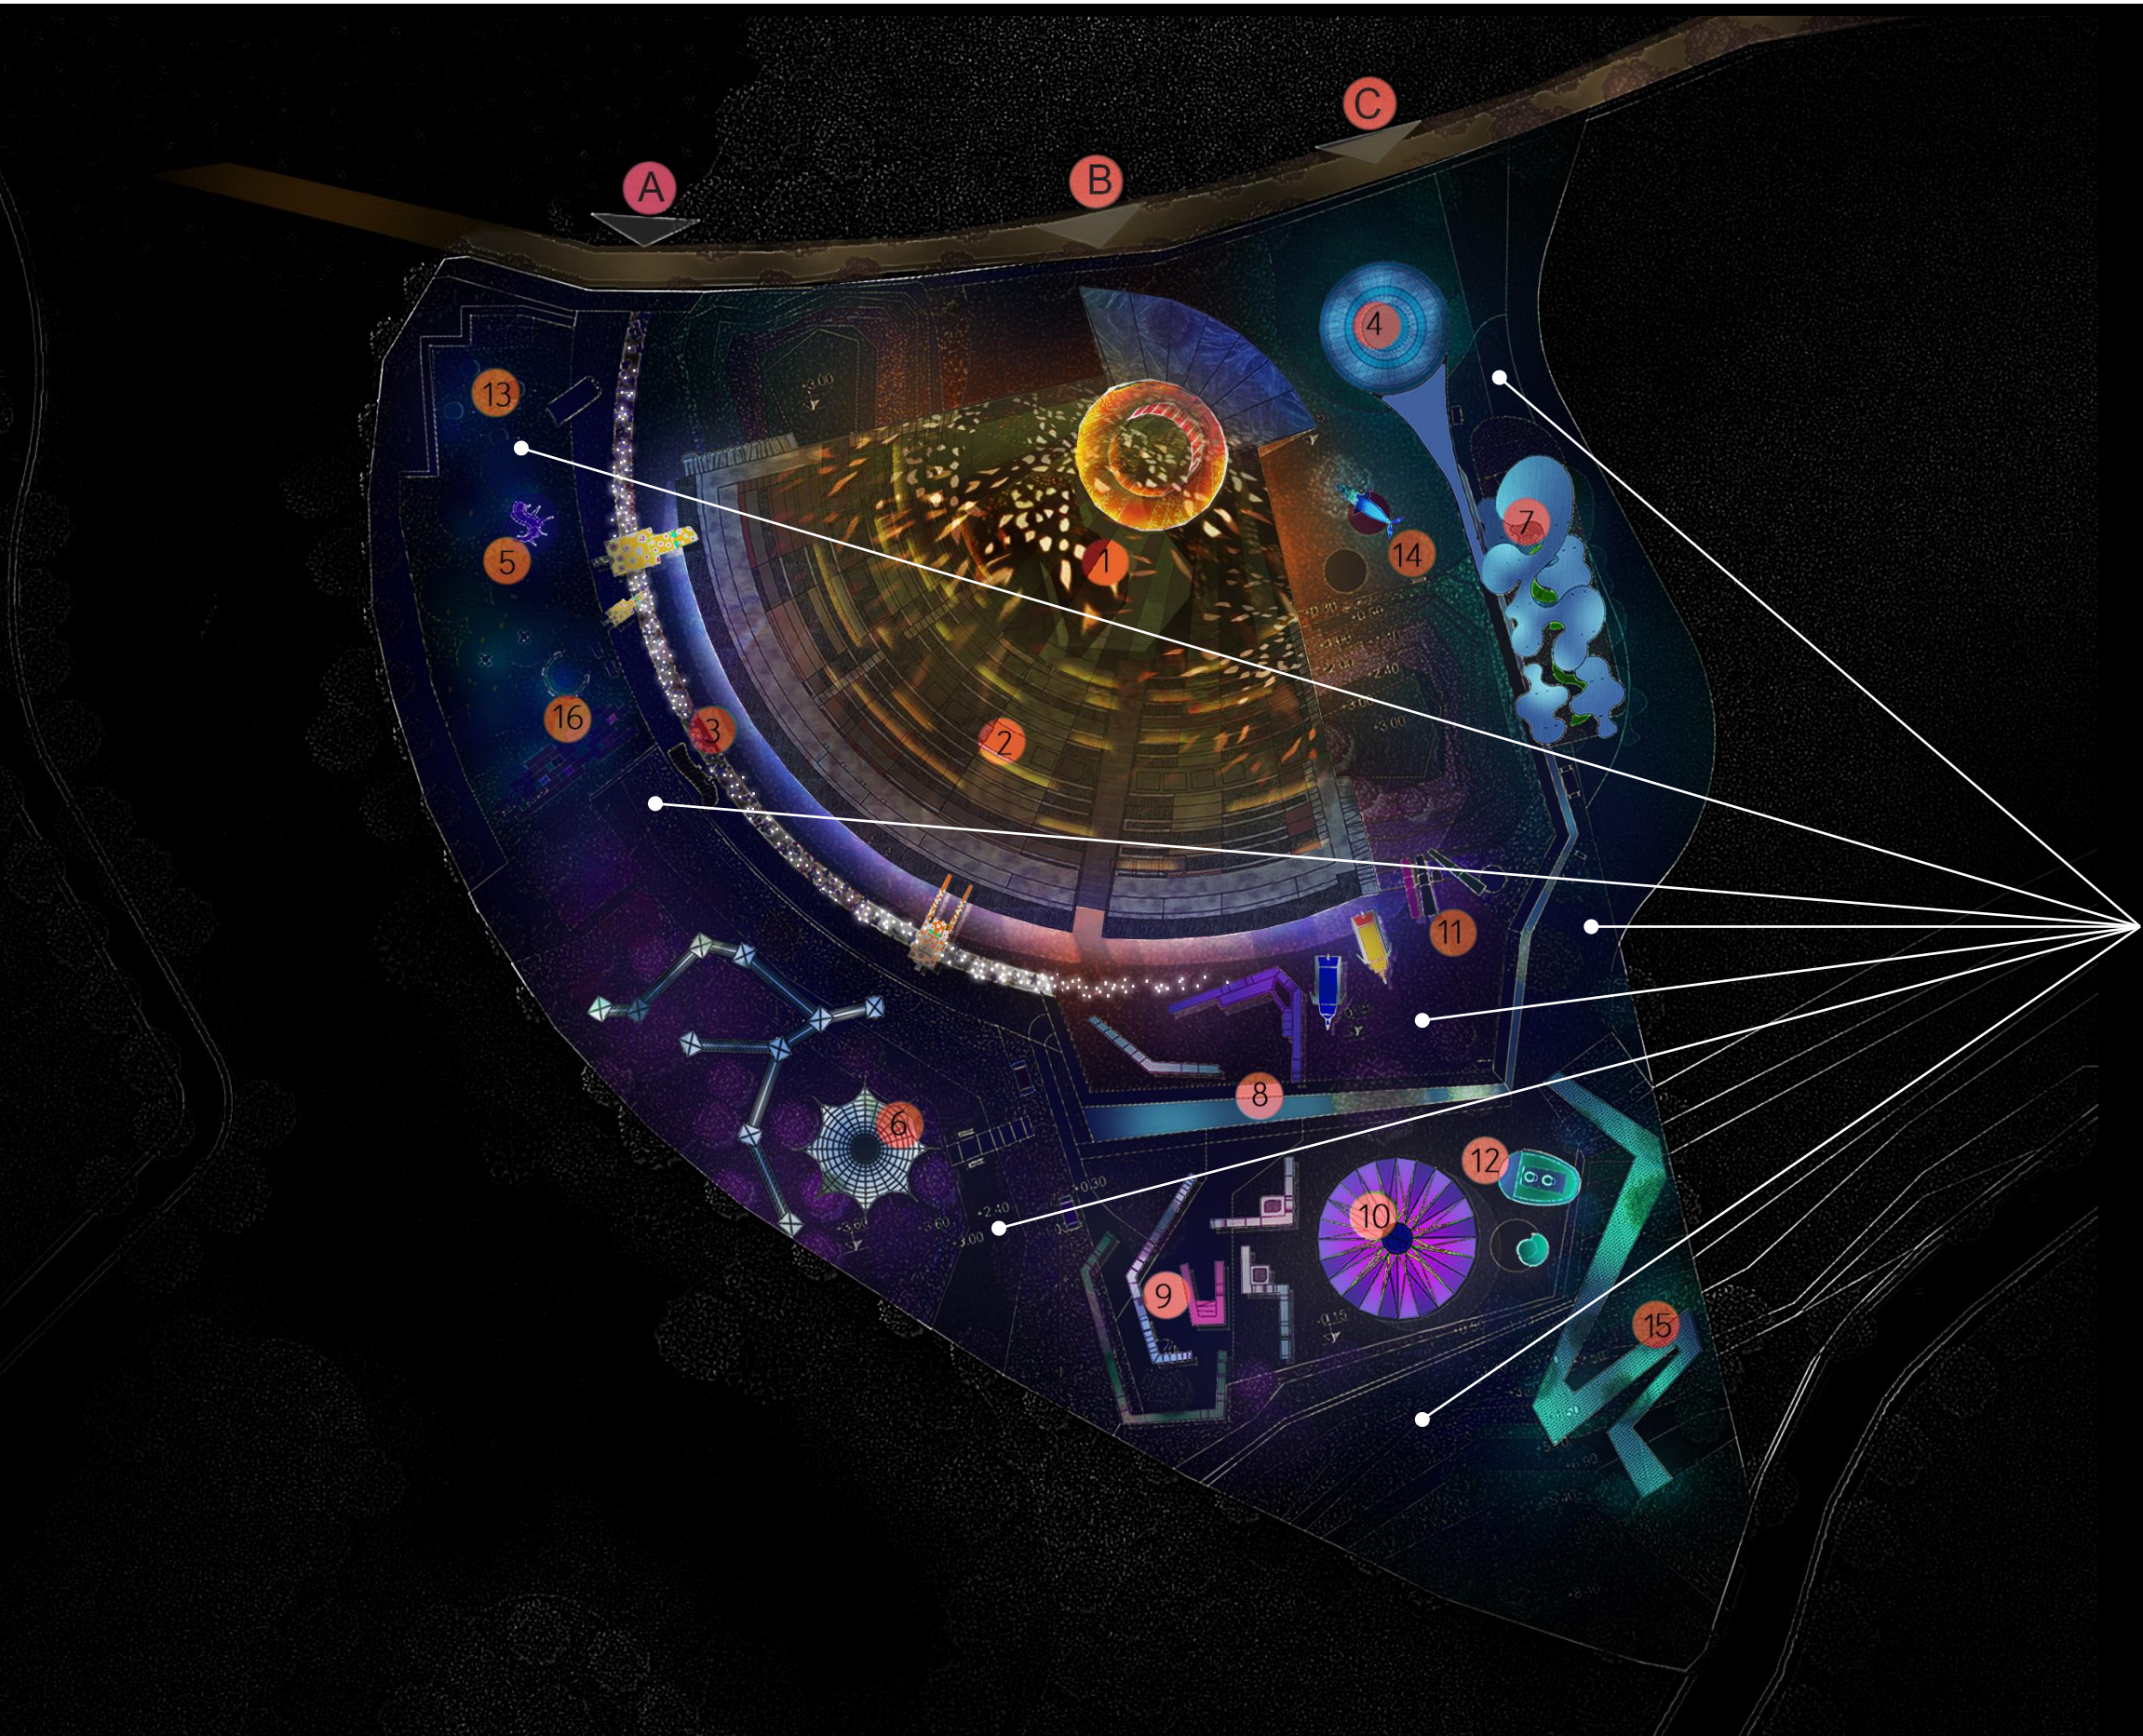

The stage - people to perform art and create their own lighting theme

The RGBW floodlight for highlighting the floating feature at stage

OPTION 2
COMMUNITY CONNECTION

More Individual

More Social

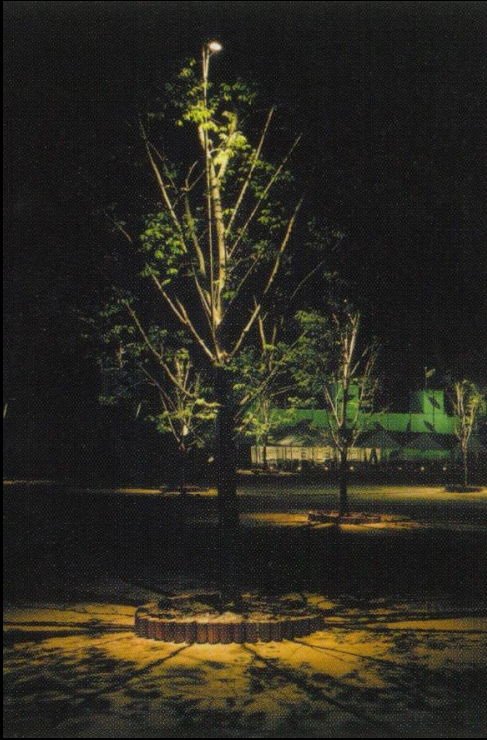

white
Low key

Color
Excited

Lighting effect is mono, calm and quiet at the outer area, then increasingly become colorful, joyful and interesting at the inside in order to draw guest attention.

Kid zone, Circulation

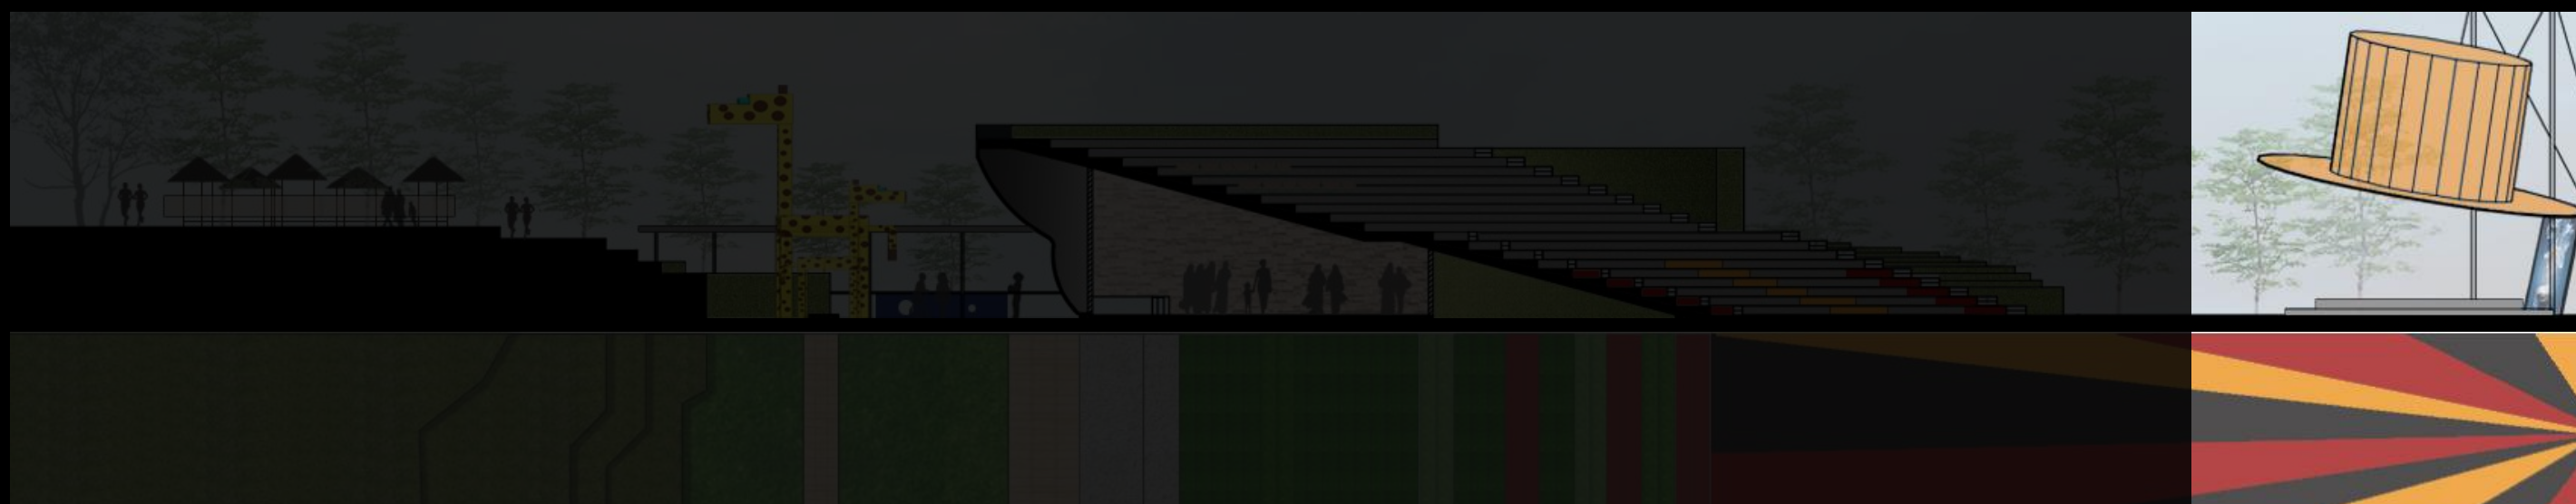

Create spots for kid's activities, selfie, pedestrian experience, etc.

Open stand for community activities

The lighting scheme should be done at low level for people convenience as well as a dedicated background for the main spot

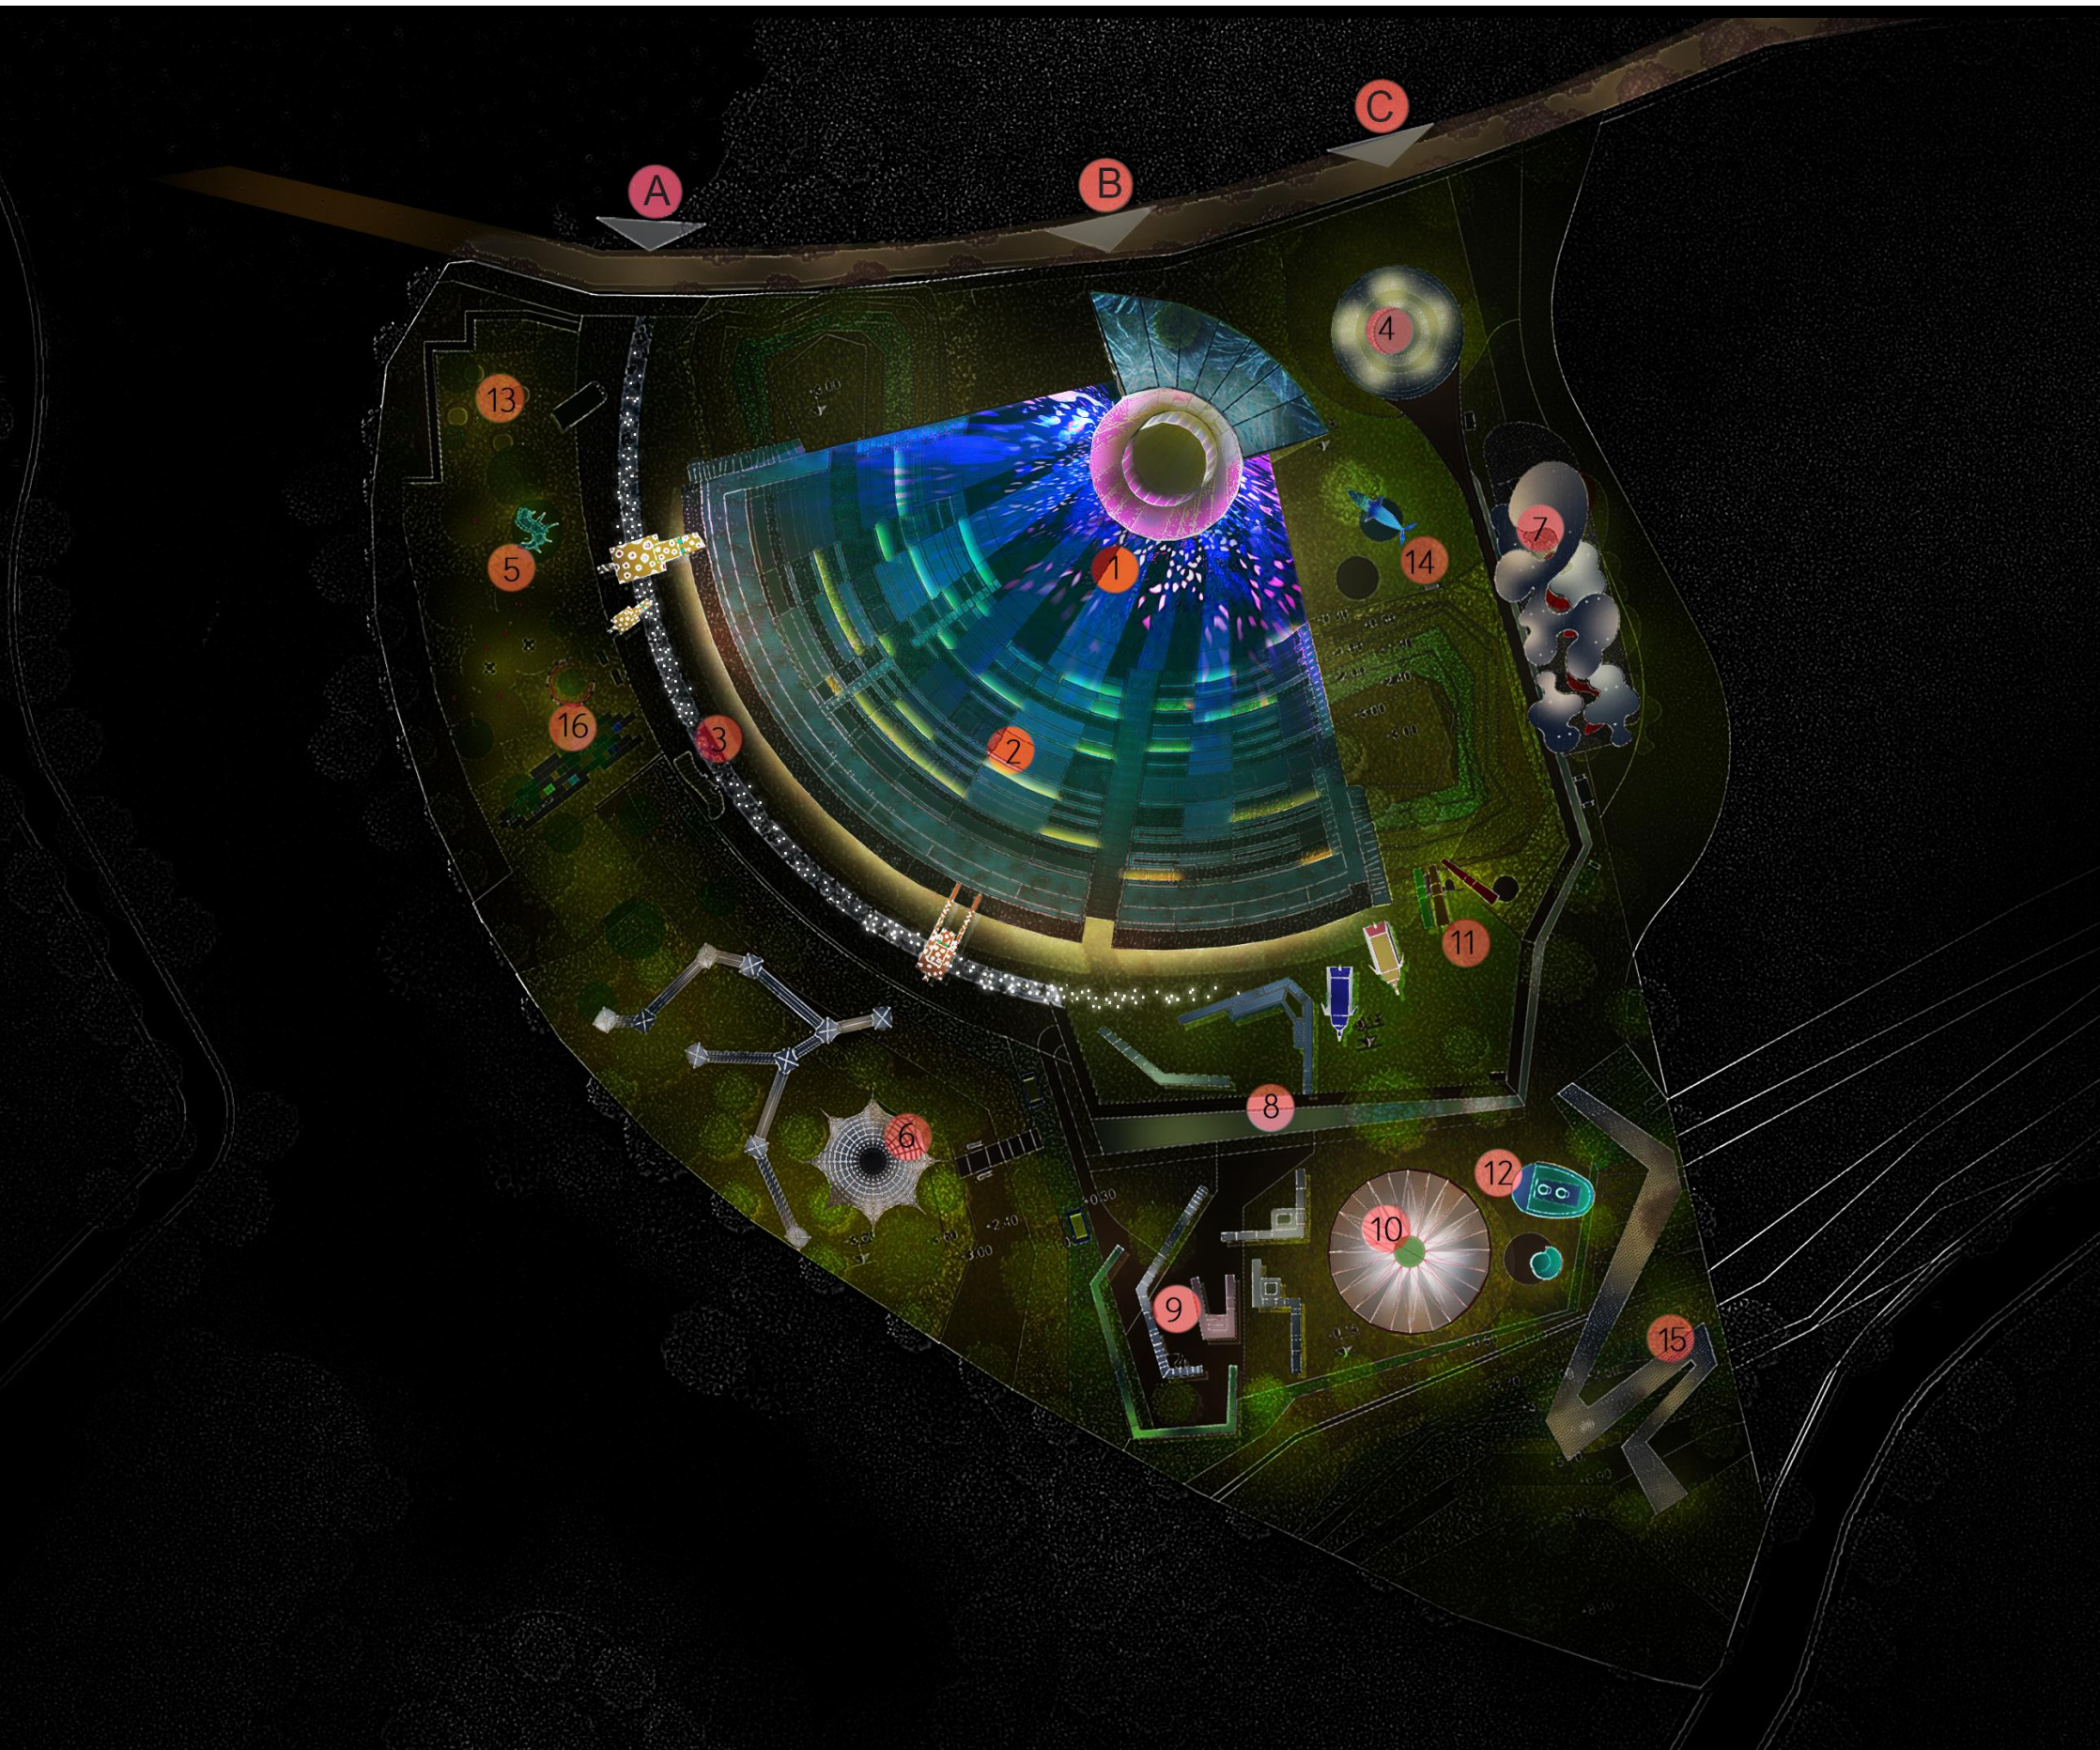

Performance point

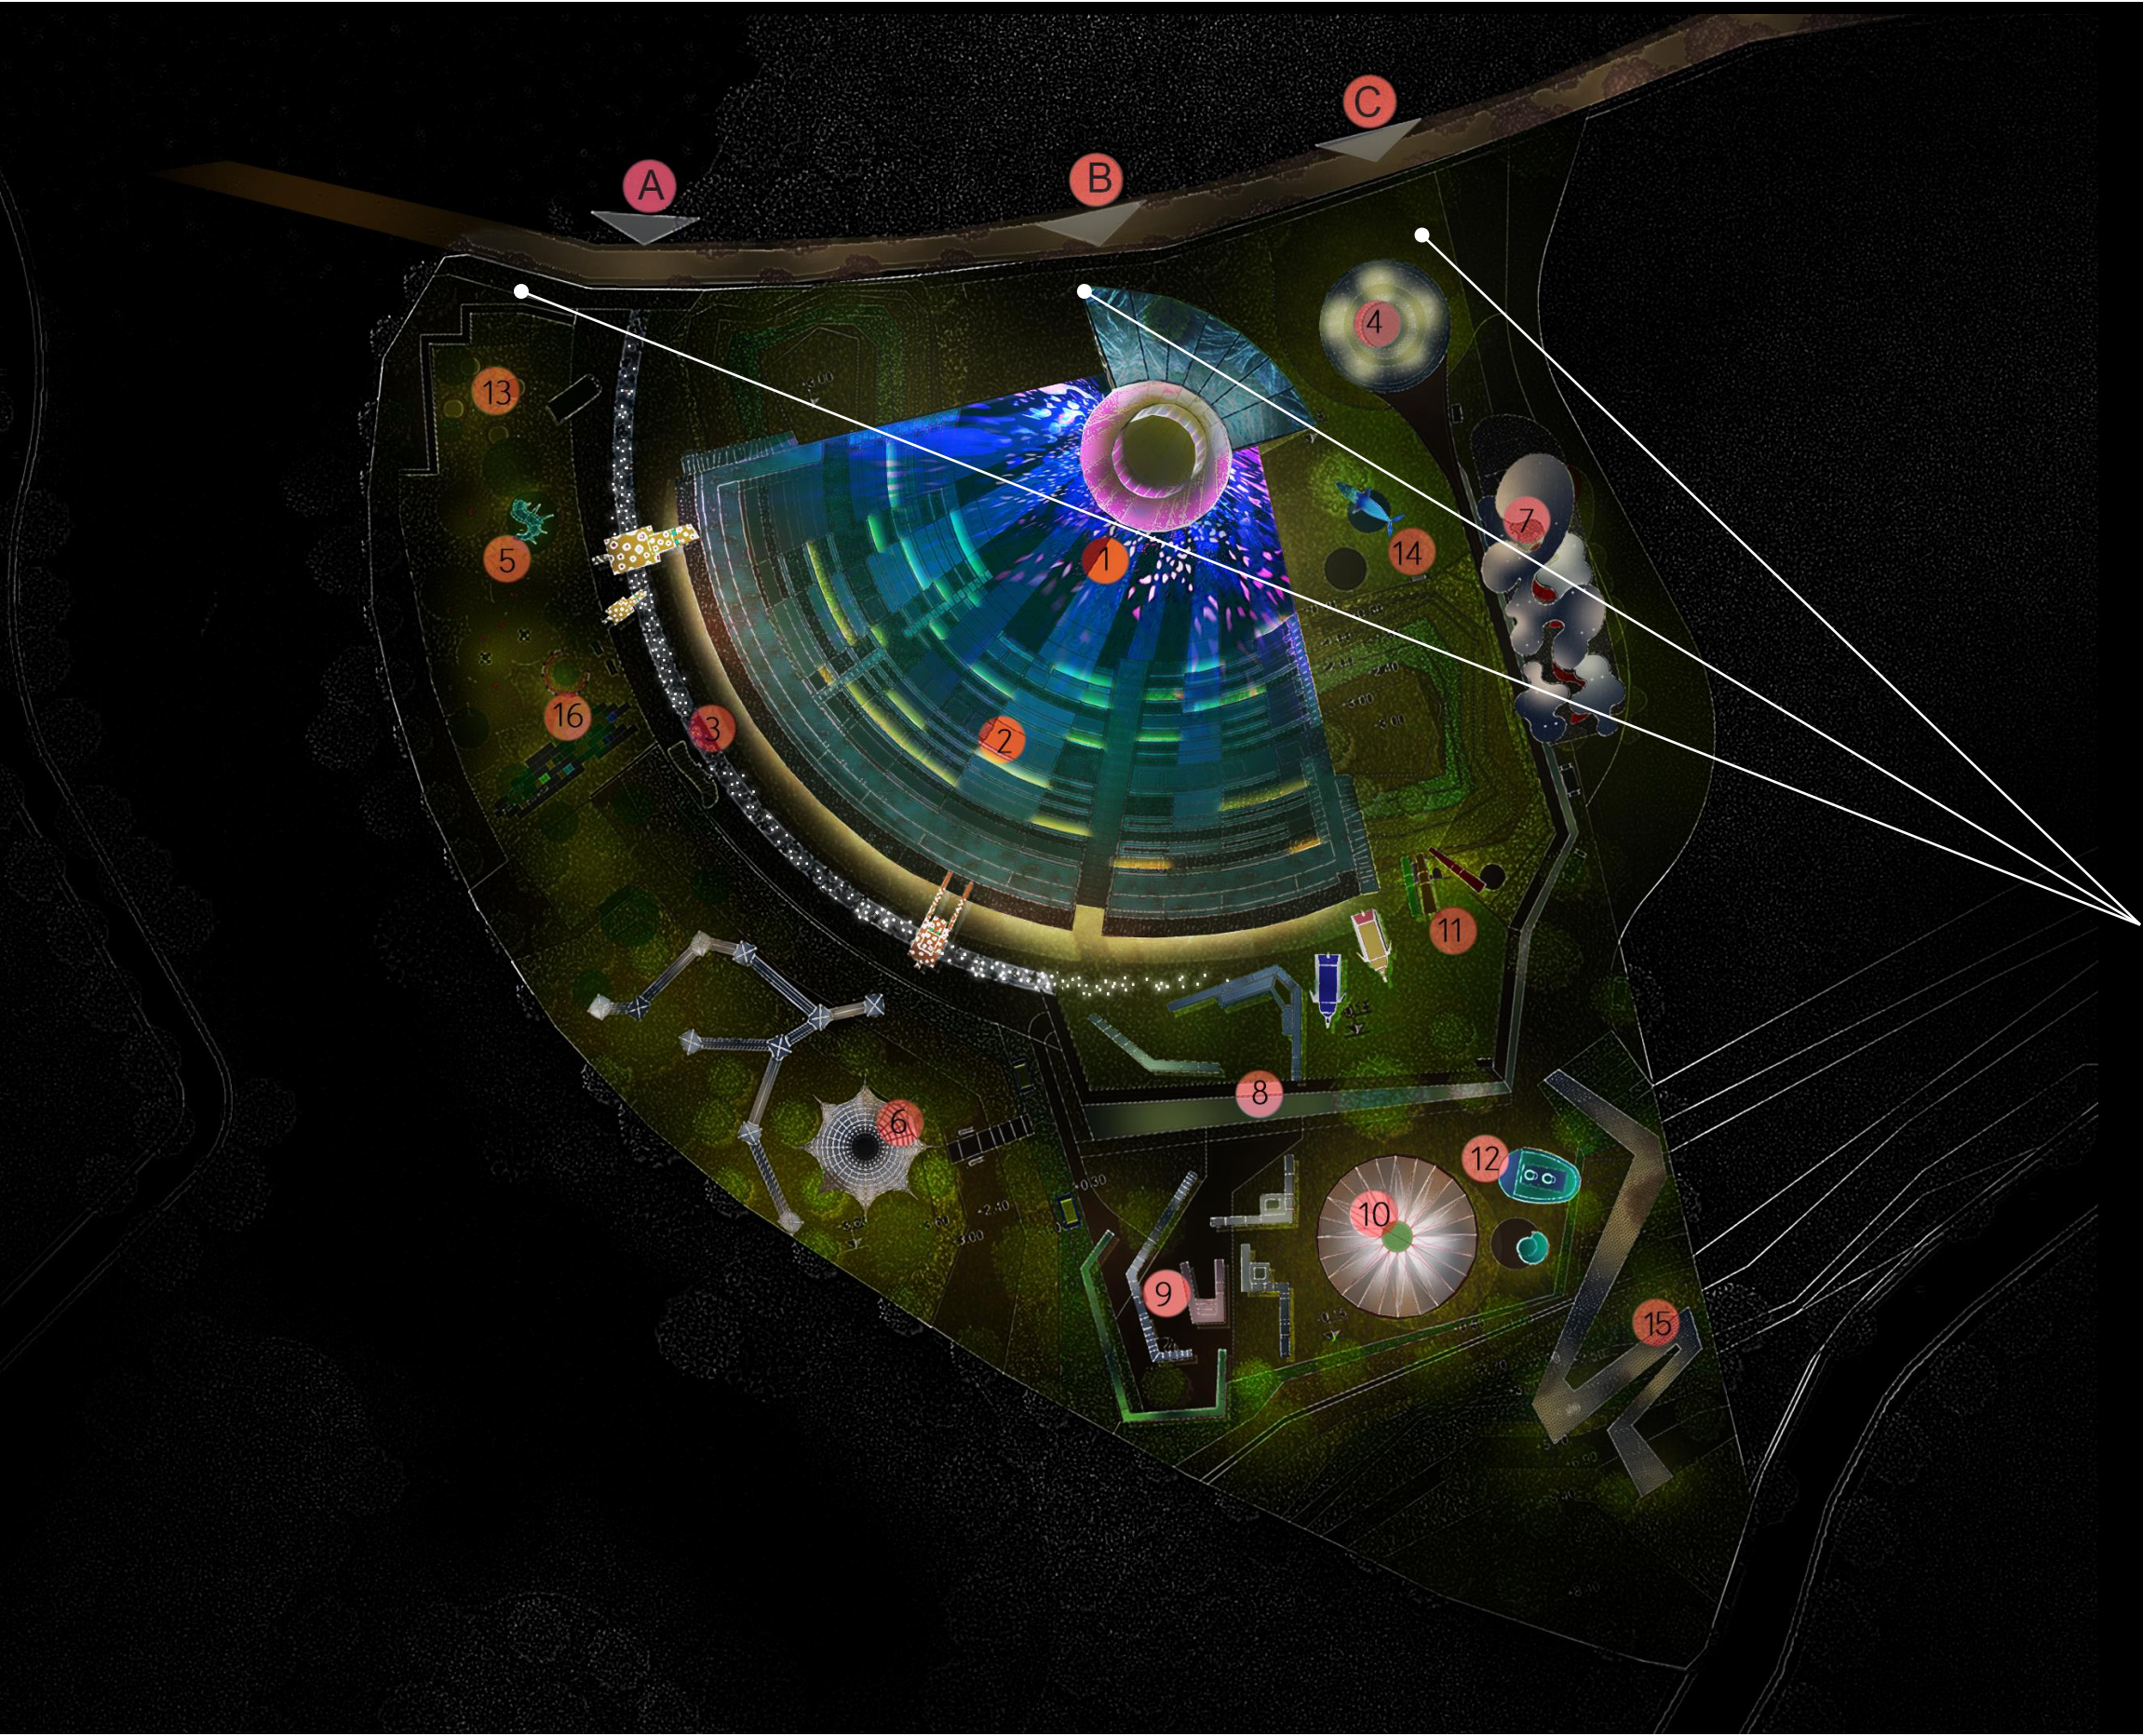

The main spot stands beyond the space by color changing lighting effect with image projection in regular case, the images are in accordance with architectural design intent

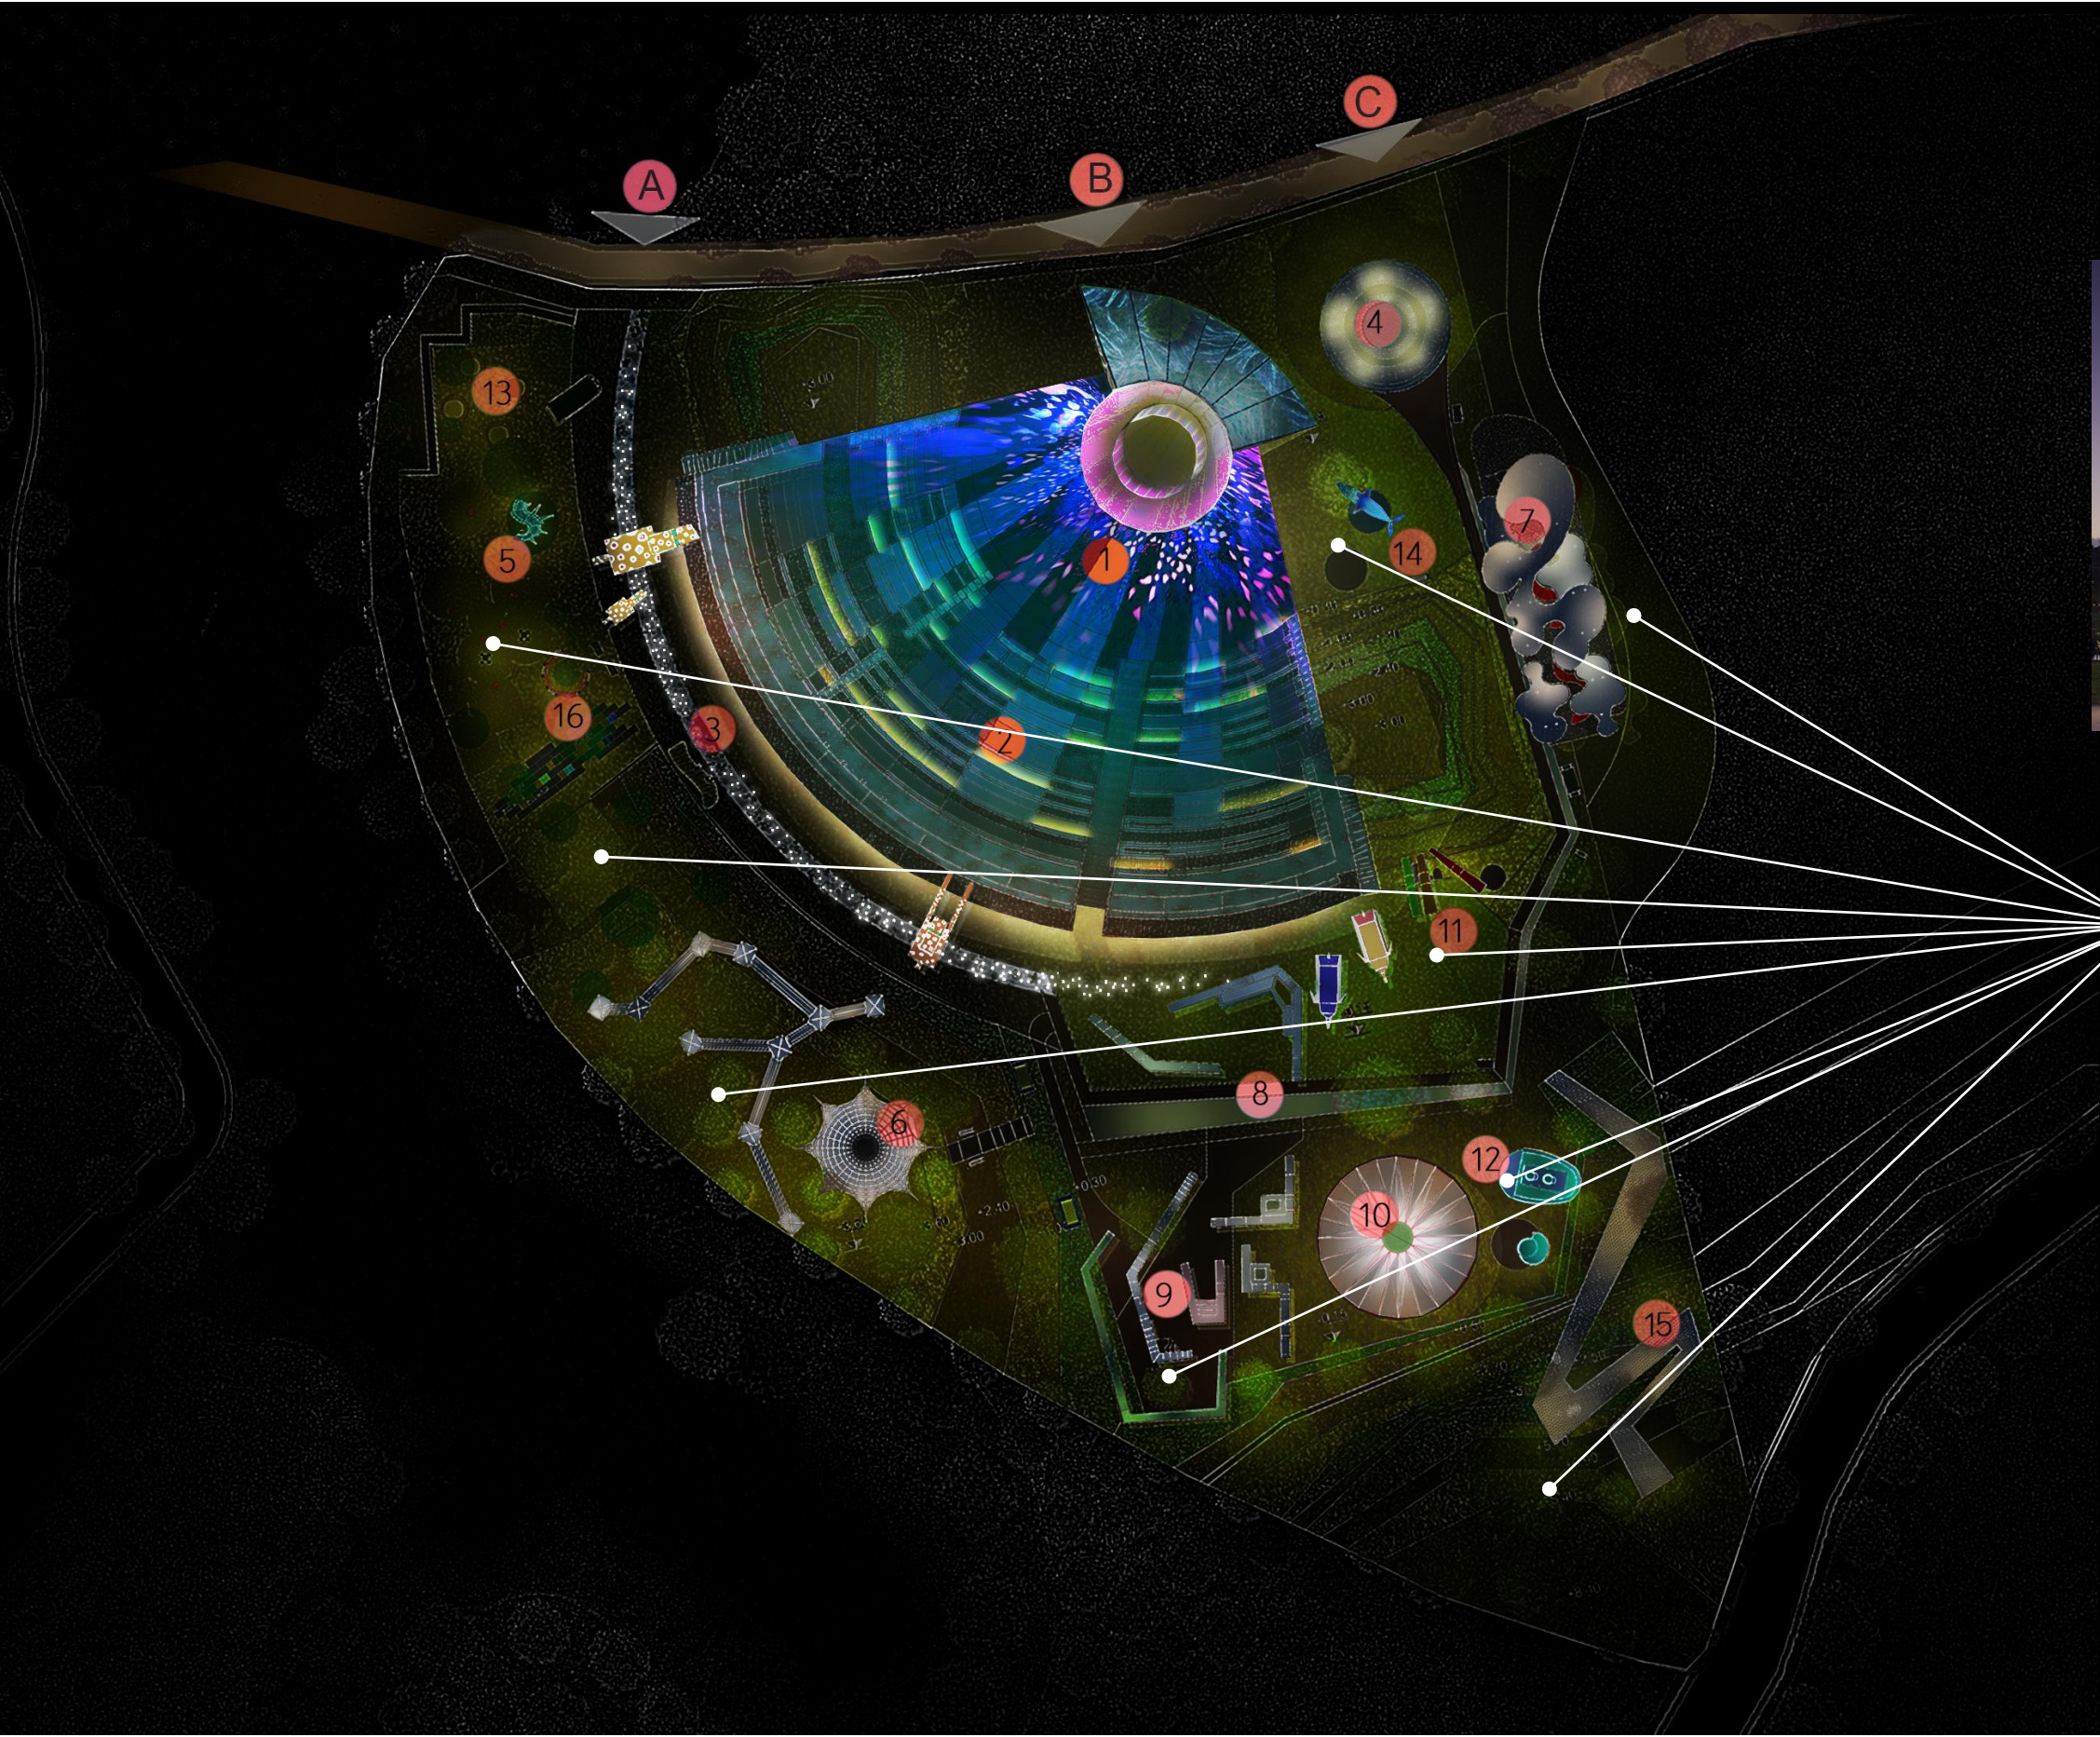

if performing event, the stage lighting should be incorporate into the system to create the complete lighting set.

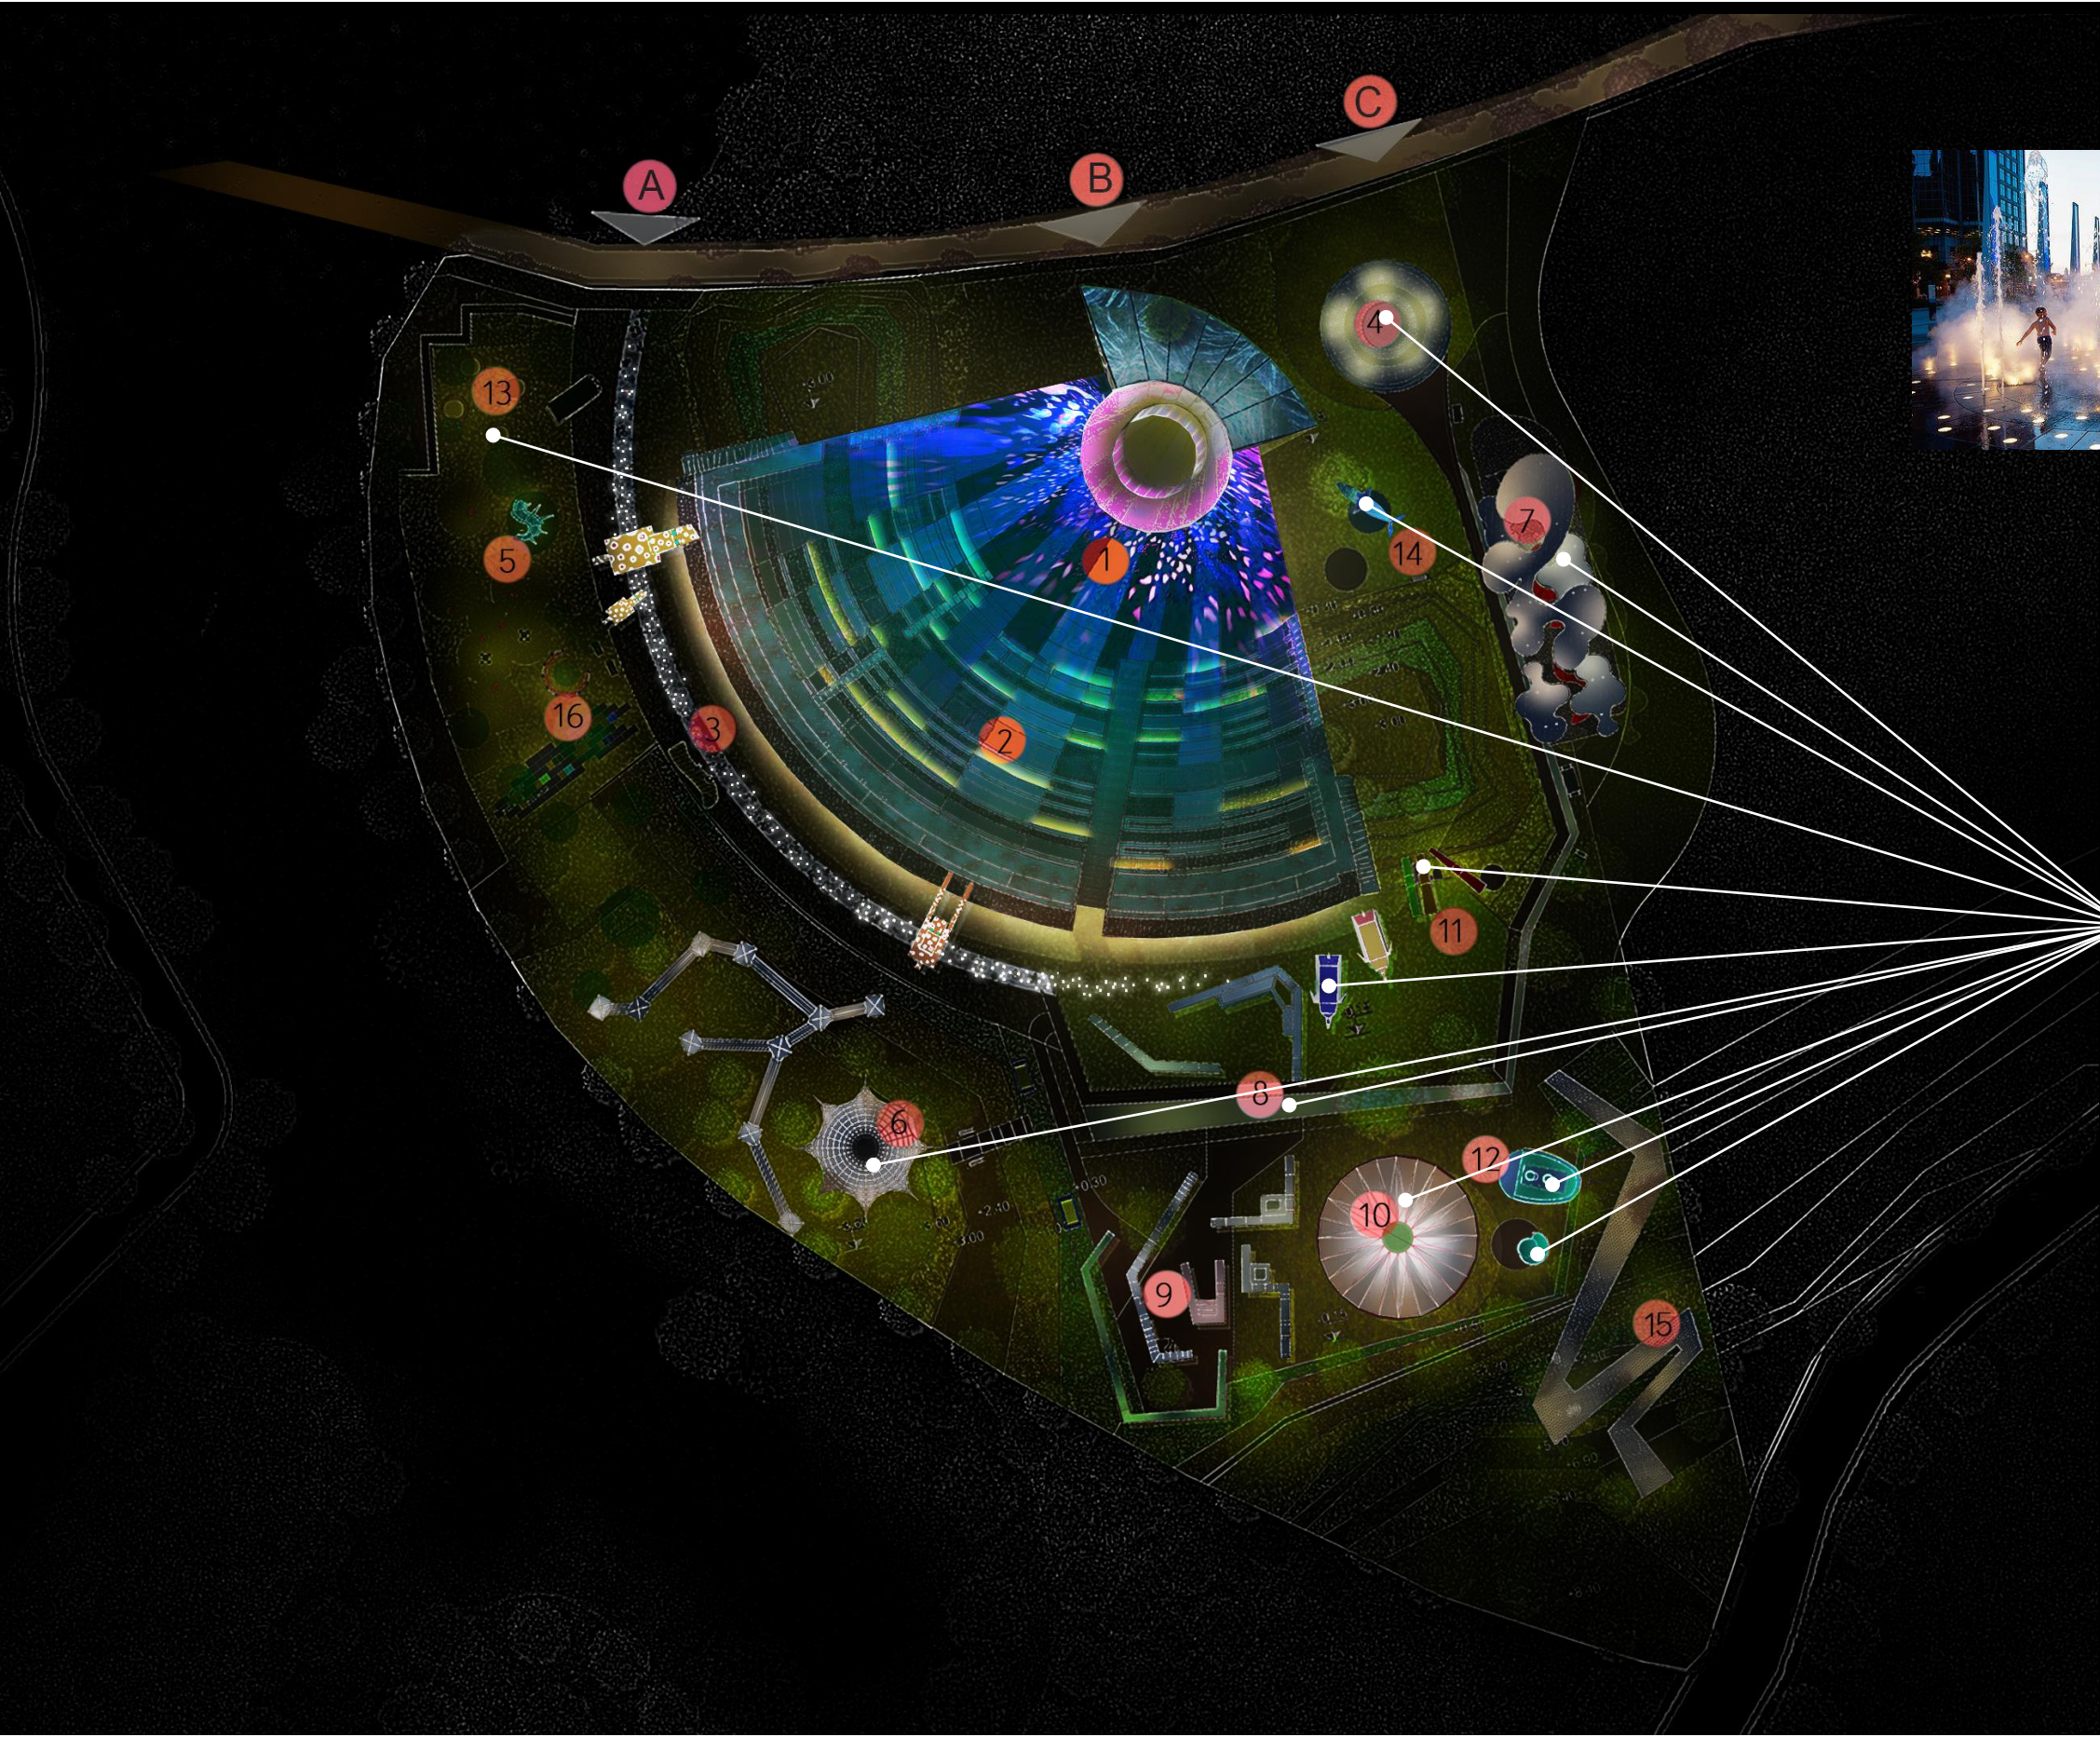

1. Performing stage
 2. Audience seats
 3. Starry night walk-path
 4. Water fountain
 5. Outdoor kid activities
 6. Outdoor playground
 7. Food court
 8. Water fountain
 9. The maze
 10. Indoor playground
 11. Sliding board for park
 12. Sliding board for pool
